
CUMULATIVE INDEX OF THE JOURNAL OF THE COMMUNITY DEVELOPMENT SOCIETY VOLUMES 21-27 1990-1996

By Melanie Hayes

CONTENTS

Guide to Usage	267
Author Index	268
Subject Index	276
Book Review Index	280

GUIDE TO USAGE

This index of the *Journal of the Community Development Society* covers the period from 1990 to 1996 for volumes 21 to 27. Earlier indexes can be found in the following issues. An index for volumes 1 to 10, 1970 to 1979, prepared by James A. Christenson, can be found in Volume 10, Number 2, 1979. An index for volumes 11 to 20, 1980 to 1989, prepared by Dauda T. Fadeyi, can be found in Volume 20, Number 2, 1989. For the sake of continuity and purpose of comparison, this index was prepared following essentially the same procedures used for the previous indexes.

The index is divided into three separate sections: an author index, a subject index, and a book review index. Articles can be located by author or subject. If the name of the author is known, the article can be located by searching for the author's last name in the author index. If there are multiple authors, the article can be located by looking up the last name of any one of the authors. Following the senior author's name is the title, year, volume, issue number, and page numbers of the article.

To locate articles on a particular subject, the subject index should be consulted. Subject categories contain subcategories and a number of cross-

references to help simplify the search. Each article published in volume 21 to 27 appears at least once, and many appear more than once because of overlapping subject matter. The subject index contains the senior author's name, the year, volume, issue number, and first page number of the article. The complete citation, including the exact title of the article and names of the other authors, if applicable, can be found by looking up the senior author's last name in the author index.

Book reviews are listed in the book review index by the last name of the senior author of the book. After the senior author's name, the name(s) of the author(s) (when applicable), the book title, and the year, volume, issue number, and first page number of the review are cited. The reviewer's name appears in brackets at the end of each citation.
